ALTEN is opening a Delivery Center in Iași (Romania)

On May 10th 2017, ALTEN is opening its first Romanian Delivery Center, in Iași (East Romania), that will gather more than 160 employees including mainly engineers. This opening strengthens and structures the lasting presence of the French group, world leader in engineering and technology consulting, in Romania.

With an international growth of +11.5 % and more than half of its turnover made internationally in 2016 (52%), ALTEN is a group deeply established worldwide that accompanies the projects of Industry and Tertiary leaders. Located in more than 20 countries, the Group is enabled to advance in line to local and business special features.

The creation of the Alten Delivey Center (ADC) in Iași is part of an overall strategy to create a big platform of Nearshore and Offshore engineering centers. The building of such a platform enables ALTEN Group to cover a very wide spectrum of skills and business sectors, and to ensure consistence in processes and operational organization.

This new ALTEN Delivery Center (ADC) will work on outsourced projects for its clients especially in Automotive (PSA, Renault, Jaguar), Energy & Life Sciences (General Electric Power, GE Healthcare, Thorn Lighting), Aeronautics Space & Defence (Airbus Helicopters), that are evidence of the multi-sectoral expertise of ALTEN.

ALTEN is planning to increase its workforce in Iași to have in total 200 employees by the end of the year with the recruiting of engineers in Mechanical, Electric/Electronic and Supply Chain.

On May 10th, the Iași ADC located in the Nicolina Office Center will be officially open with the participation of local authorities and Stéphane Ougier, Executive Vice President ALTEN France & Solutions subsidiary, Pascal Amore, ALTEN Head of Structured Projects, Didier Marchet, ALTEN Technical Director and Delia Orhei, Director of Operations ADC Iași.
